

## Probe Technology is grown up

Since more than 20 years J&M Analytik AG is specialised in development and applications for spectrometer systems for varied use. A successful development was the probe technology for process analysis. Here J&M received important innovation awards.

Due to a strategic decision this probe technology, including the **Lighthouse Probe™**, was sourced out. In the future

**JMC** Joachim Mannhardt Consulting  
Joachim Mannhardt  
Heergasse 3  
73569 Eschach

will take care of this technology. We like to inform you that Mr. Joachim Mannhardt has left the executive board, but will continue to work for J&M as a senior consultant.

This decision has no influence on our cooperation with you. We are happy to support you in the best way possible.

J&M Analytik AG Team
